Team dynamics and Strategic Choices

The Planet

Because of an imminent disaster (decide which one), the Earth is going to explode. There is a rocket which can take people to another planet. The rocket can take up to 10 people and will not be 100% sure it can come back to take more people. So, it is important that the first 10 people can repopulate the new planet with the human species just in case the rocket is not be able to go back to the Earth. Talk to your teammates and decide which ten people should go to the new planet:

1. 30-year-old female, psychologist, counselor, has fear of flying
2. 80-year-old male, retired judge
3. 13-year-old male, straight A student, wants to be a police officer
4. 49-year-old male, governor of California
5. 39-year-old female, has 4 children, graphic designer
6. 60-year-old male, computer technician
