# Let's get ready

**This lesson is about:**

- **Students working in teams to design and present a solution to protect an egg dropped from a height.**
- **Building teamwork, problem-solving, and communication skills through creative thinking and reflection.**

**Co-funded by  
the European Union**

# Let's start

Co-funded by  
the European Union

## “The egg drop challenge”

- Put people into teams, and ask each to build a package that can protect an egg dropped from a specified height
- Each team must agree on a nominated speaker, or speakers, for their presentation.
- Once all teams have presented, they must drop their eggs, assess whether the eggs have survived intact, and discuss what they have learned

# Let's discuss

1. How did your team decide which design to use?
2. Did everyone have a chance to share ideas?
3. What worked well in your teamwork and what could be improved?
4. How did you feel presenting your solution to others?

# Let's reflect

- I can share my ideas confidently in a team.**
  - I can listen and respect others' opinions.**
- I can help my team find creative solutions.**
  - I can present our work clearly to others..**
